

AGP will not load AGP finished product into vessels in which the previous load contained food allergens (i.e. crude soybean oil, crude peanut oil, soy milk, lecithin, and dairy).

AGP will waive the above requirement if the carrier can provide a written letter validation from the carrier's wash facility that their wash system effectively removes food allergen material and that the wash station has a procedure in place to test and validate such practices.

The following is the list for acceptable prior cargoes for refined food grade soybean service that we will use when loading trucks.

Alcoholic beverages (i.e. rum, wine)
Canola Oil (RBD)
Citric Acid (Food Grade only)
Coconut Oil (RBD)
Corn Oil (RBD)
Cottonseed Oil (RBD)
Ethyl alcohol – (Food Grades only)
Glycerine (from vegetable oil sources only)
Honey

Juice concentrates (i.e. apple, grape)
Molasses
Mono and Diglycerides (from vegetable oil sources)
Olive Oil*
Palm Oil (RBD)
Palm Kernel Oil (RBD)
Peanut Oil (RBD)
Phosphoric Acid – (Food Grades only)

Propylene Glycol—(USP and Food Grades only)
Polysorbate 60 & 80
Potable Water
Rice Bran Oil (RBD)
Safflower Oil (RBD)
Sesame Oil (RBD)

Soybean Oil (RBD)
Soybean Oil Fatty Acid Methyl Esters
(Documented as "Soybean Fatty Acid Methyl Esters" not "Biodiesel")
Sunflower Oil (RBD)
Vinegar

SUBJECT: **PRIOR CARGO LISTINGS**

Due to the increase in truck traffic, the following is the list for acceptable prior cargoes for refined food grade soybean oil service that we will use when loading trucks. The list also notes whether a single or double wash will be required. The following is an updated list.

Acetic Acid-(USP and Food Grades only)**
Alcoholic beverages (i.e. rum, wine) **
Canola Oil (RBD*) (Crude**)
Chocolate**
Citric Acid (Food Grade only)**
Cocoa Butter**
Coconut Oil **
Corn Syrup**
Corn Oil (RBD*) (Crude**)
Cottonseed Oil (RBD*) (Crude**)
Dairy products <40°F (pasteurized milk, pasteurized cream, buttermilk, whey) ***
Defoamers/antifoamers (for food processing only) **
Ethyl alcohol - (Food Grades only)*
Glycerine (from vegetable oil sources) **
Honey**
Juice concentrates (i.e. apple, grape)*
Lactic Acid (Food Grade only)**
Molasses**
Mono and Diglycerides (from vegetable oil sources) **
Olive Oil*
Palm Oil* (RBD*) (Crude**)
Palm Kernel Oil **
Peanut Oil* (RBD*) (Crude**)
Phosphoric Acid - (Food Grades only)*
Propionic Acid (Food Grade only)**

no wash
Industrene

Propylene Glycol – (USP and Food Grades only)*
Polysorbate 60 & 80**
Potable Water*
Rice Bran Oil (RBD*) (Crude**)
Safflower Oil (RBD*) (Crude**)
Sesame Oil (RBD*) (Crude**)
Soybean Oil (RBD*) (Crude**)
Soybean Oil Fatty Acids**
Soybean Oil Fatty Acid Methyl Esters-(**Documented as "Soybean Fatty Acid Methyl Esters" and not "Biodiesel"**) **
Soy Lecithin**
Soy Milk**
Sunflower Oil (RBD*) (Crude**)
Vegetable Oil Phospholipids (AGP)**
Vinegar **

* Single wash

** Double wash (**includes crude vegetable oils**) Requires 2 separate wash certificates.

*** Double wash (proof of standard dairy wash followed by single hot water wash)

If a prior cargo is not listed above and is considered "food grade and kosher", then we will evaluate whether it will be acceptable or not in each case and update the list as necessary. Kosher status and product contamination shall have priority consideration over any and all Prior Cargo Listing.

All shipping vessels entering service with AGP shall be washed and inspected for cleanliness (free of any and all odors and/or residues). Anything on this list may require a caustic wash if an odor remains after washing. In any case, the proper wash procedures for refined oil trailers must be followed. Carriers shall present a manifest of the preceding cargo and wash certificate before loading.
